

NEWS RELEASE

POWER STATION APPOINTS PROGRAM MANAGEMENT SPECIALIST

Orange, CA, February 5, 2008 / PR Newswire / Power Station, LLC

Power Station LLC is pleased to announce the appointment of Karen Cozakas to serve as the Company's Program Manager.

Karen brings a wealth of experience to the role, including twelve years developing and managing the technical support platform for Cardinal Healthcare, and its 20,000 employees. At Cardinal, Karen was responsible for infrastructure systems that supported \$38 billion in sales, \$2.4 billion in inventory and over 1 million daily order lines. Other notable projects include the national deployment of Cardinal's wireless technologies, and the full infrastructure upgrade project for 22 nationwide warehouse/distribution centers.

Karen later moved to Verizon, where she managed Verizon's California Multiple Award Schedules (CMAS), and the installation of their DMV Terminal Project, which entailed the development and management of policies including risk identification and mitigation, communications, escalation, scope assessment, transportation and timeline controls.

For Power Station, Karen will lead the Company's "Program 08", which has two initiatives: (i) the perfection, enhancement, documentation and protection of its source codes, applications and all other intellectual properties, and (ii), the Company's installation procedures and schedules for PowerPort placement and roll-out nationwide, in what is expected to be an aggressive installation year.

Henry Mauriss, Managing Member of Power Station, had this to say, "We welcome Karen to Power Station with great anticipation, and are delighted to add this caliber of management to an area of responsibility that is so important to the Company. With Karen, I am confident our systems and installation management are in very good hands".

The PowerPort is the only product of its kind. In a single location, it offers Internet access; laptop rentals; secure battery charging for over 1200 models of cell phones, PDA's, Blackberries, etc, and digital content downloads. People with time to spare in an airport can rent laptop computers and work at their leisure in the gate areas, or stop and use a computer while they dine. Those in a hurry can log on, do their essential business or check their e-mail, and be on their way Look for us at your home airport soon.
